2004 ADDENDA TO THE DRY CLEANER WORKBOOK AND CERTIFICATION

This is an update to the original dry cleaner workbook and certification, specifically addressing errata and changes in the MA Hazardous Waste regulations 310 CMR 30.000.

Dry Cleaner Workbook Revisions

June 1, 2000

The standards C16-C31 and C33-C35 of the workbook refer to question 19 on the certification. See page 18 of the workbook.

February 27, 2004

The storage limit for a Very Small Quantity Generator (VSQG) is raised from 1,320 lbs to 2,200 lbs. See Standards A-5 (page 6) and C-16 (page 18) in the workbook.

The storage limit for a Small Quantity Generator (SQG) is raised from 4,400 lbs to 13,200 lbs. See Standards A-6 (page 6) and C-17 (page 19) in the workbook.

Language in **bold** is added to Standard C-26 on page 20. Generally, intact concrete will contain leaks or spills, **however, spill containment (such as a berm) may be necessary if containers are located near a drain or an exit.**

The citation for additional Large Quantity Generator (LQG) standards in Standard A-9 on page 7 has been changed to 310 CMR 30.341(1)(b).

Dry Cleaner Compliance Certification Revisions

June 1, 2000

For informational purposes, under Facility Information of the certification form, two questions were added regarding whether a facility is new or under new ownership since the last filing date.

The standards A2 and B7 of the workbook refer to question 14 of the certification.

An additional question on the certification was added for the requirement of determining hazardous waste generator status. See question 17a of the certification and Page 6 of the workbook.
